

A New Model for National Security Innovation

The National Security Innovation Network is a Department of Defense program office that leverages new networks of innovators to solve national security problems through three main lines of effort: National Service, Collaboration, and Acceleration.

NATIONAL SERVICE

Creates new models and pathways to service for those wishing to serve without having to put on a uniform, ensuring that generational and cultural differences are not barriers.

COLLABORATION

Facilitates collision events that connect service members with academic and venture partners to develop and prototype new service member driven solutions.

ACCELERATION

Offers programs that promote the development and growth of dual-use ventures that respond to service members' needs.

NSIN is dedicated to bringing together defense, academic and entrepreneurial innovators.

NSIN helps solve national security problems by connecting people and resources outside the Department of Defense (DoD). Together, the communities of defense, academia and early-stage venture communities will drive the innovations that help us realize the better, safer, stronger world we want to build.

NSIN creates new communities of innovators.

NSIN brings together defense, academic, and early-stage venture communities to solve DoD problems.

NSIN is helping to build a more innovative DoD.

Our programs help transform emerging technology into warfighting capabilities.

NSIN is making difference.

This is a truly **amazing story of collaboration** between a small, disruptive technology company and the government," **John Goolgasian, Geospark Analytics chief operating officer.**

We have **stripped away typical government bureaucracy** and empowered the expertise of [innovators] to both move forward effectively and expediently. We are rapidly **increasing our technical knowledge and application acumen to unlocking the future**—all through collaboration!" **USMC's NavalX SoCal Tech Bridge Director Lt. Col. Brandon Newell.**

NSIN is active across the nation.

NSIN is headquartered in Arlington, VA, and our Regional Network Team operates globally, with Regional Directors stationed across eleven regions in the United States, and University Program Directors embedded in **17 leading research institutions and counting.**

NSIN collaborates with major research universities.

NSIN's network reaches students at **71 universities.** Our programming provides students and faculty with problem-solving opportunities and pathways to national service.
